

# Perioperative Paediatrics (POPPI) for Anaesthetic and Recovery Nurses

KIDS SIMULATION AUSTRALIA

## Course overview:

POPPI is designed to provide a comprehensive update for anaesthetic and recovery nursing staff who are involved in the care of paediatric patients.

Participants will have the opportunity to gain specific knowledge and skills required to manage children in the perioperative period.

The course is a one day interactive program utilising medium and high fidelity simulation, and using real life scenarios.

## Learning objectives:

Understand the specific differences between adults and children, with particular emphasis on airway management.

Revise and practise paediatric resuscitation.

Recognise and effectively manage common issues and serious emergencies that occur in children in the perioperative period.

Develop skills in effective team leadership, team work and communication during emergencies.

## Who Should Attend?

This course is designed for anaesthetic and recovery nursing staff caring for children in non-tertiary paediatric hospitals.

## CPD:

To be determined

## When and where will it be held?

### Location

Simulation Centre (KSA)  
Children's Hospital Westmead  
Westmead  
NSW 2145

### Date and Time - 2024

March 18<sup>th</sup> (Monday)

0800-1600
